Congress of the United States
Washington, DC 20515

May 1, 2014

The Honorable Gina McCarthy
Administrator
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, NW
Washington, D.C. 20460

The Honorable John M. McHugh
Secretary
Department of the Army
The Pentagon, Room 3E700
Washington, D.C. 20310

Dear Administrator McCarthy and Secretary McHugh:

We write to express our serious concerns with the proposed rule re-defining the scope of federal power under the Clean Water Act (CWA) and ask you to return this rule to your Agencies in order to address the legal, economic, and scientific deficiencies of the proposal.

On March 25, 2014, the Environmental Protection Agency (EPA) and the U.S. Army Corps of Engineers (USACE) released a proposed rule that would assert CWA jurisdiction over nearly all areas with any hydrologic connection to downstream navigable waters, including man-made conveyances such as ditches. Contrary to your agencies' claims, this would directly contradict prior U.S. Supreme Court decisions, which imposed limits on the extent of federal CWA authority. Although your agencies have maintained that the rule is narrow and clarifies CWA jurisdiction, it in fact aggressively expands federal authority under the CWA while bypassing Congress and creating unnecessary ambiguity. Moreover, the rule is based on incomplete scientific and economic analyses.

The rule is flawed in a number of ways. The most problematic of these flaws concerns the significant expansion of areas defined as "waters of the U.S." by effectively removing the word "navigable" from the definition of the CWA. Based on a legally and scientifically unsound view of the "significant nexus" concept espoused by Justice Kennedy, the rule would place features such as ditches, ephemeral drainages, ponds (natural or man-made), prairie potholes, seeps, flood plains, and other occasionally or seasonally wet areas under federal control.

Additionally, rather than providing clarity and making identifying covered waters "less complicated and more efficient," the rule instead creates more confusion and will inevitably cause unnecessary litigation. For example, the rule heavily relies on undefined or vague concepts such as "riparian areas," "landscape unit," "floodplain," "ordinary high water mark" as determined by the agencies' "best professional judgment" and "aggregation." Even more egregious, the rule throws into confusion extensive state regulation of point sources under various CWA programs.

In early December of 2013, your agencies released a joint analysis stating that this rule would subject an additional three percent of U.S. waters and wetlands to CWA jurisdiction and that the rule would create an economic benefit of at least $100 million annually. This calculation is seriously flawed. In this analysis, the EPA evaluated the FY 2009-2010 requests for jurisdictional determinations – a period of time that was the most economically depressed in
